

Product Information

Product designation:

Polymer High Gloss 2000

Product group:

Paintwork preparation

Product description:

For preserving and care of all new, as-new motor-vehicle paints or paints thoroughly cleaned off using Polytop rubbing compounds. The polish renders an extremely smooth surface with top deep shine. The highly balanced combination of hard waxes, polymers, PTFE, polishing agents, slip agents and cleaning components guarantee very simple handling at manual or machine processing. The dried-on residue on new cars can also be easily removed.

Application/Processing:

Manual processing: Polymer High Gloss 2000 is evenly applied onto the paint surface to be treated and polished off by using a Polytop polishing cloth. The residue is removed with a Polytop microfibre cloth after the product has dried a little. Machine processing: Polymer High Gloss 2000 is evenly applied onto the paint surface with a soft polishing sponge and polished off at a speed of 1,500-2,000 r.p.m. Afterwards, remove the dried-on residue by using a Polytop microfibre cloth. Shake well before use.

Additionally to this product we recommend:

Polish Bottle, art. no. 229001; Polishing Fleece (Roll), art. no. 704070; Fix Polishing Cloth, art. no. 204401, Microfibre Cloth, art. no. 712001, Polishing machine Flex LK 602 VV, art. no. 200101; Double Excentric Polisher MGR, art. no. 200206; white Polishing sponges, black Waffle Sponges.

Article no:	Packaging unit:
112001	1 l bottle
112005	5 l can
412500	500 ml bottle

revision date: 11.03.2011 - subject to technical modifications
